

IN THE CLAIMS

1-7. (Cancelled)

8. (Currently Amended) A method for performing a one-touch call operation using a mobile terminal, comprising the steps of:

requesting establishment of a call connection with a counterpart mobile terminal using the mobile terminal;

establishing the call connection when the request for establishment of the call connection succeeds;

when the request for establishment of a call connection fails:

pressing a one-touch call button of the mobile terminal; and

in response to pressing the one-touch call button, transmitting, using a phone number of the counterpart mobile terminal entered during the request to establish the call connection, a phone number of the mobile terminal and a predetermined message corresponding to the one-touch call button which is stored in the mobile terminal to the counterpart mobile terminal.

9. (Original) The method of Claim 8, wherein the predetermined message is a previously recorded voice message.

10. (Original) The method of Claim 8, wherein the predetermined message is a previously entered text message.
